Hani Siraj

Retention Marketing Lead and AI Marketing Engineer, building retention systems in Claude Code

Bengaluru, India. Working Australian hours · +91 7356338993 · hanisiraj@gmail.com · LinkedIn · Website

AI-native retention strategist with over five years of experience, focused on DTC ecommerce. I've led retention for over 30 brands, including SharkNinja, Bendon Lingerie, All Fresh Seafood and Steak King. I own the strategy and the calls that need taste, and I build AI systems and automations to handle the repetitive work behind them.

TECHNICAL AND AI MARKETING STACK

AI agents and coding: Claude Code, MCP servers, GitHub, Python.

Retention tools: Klaviyo, Shopify, Rise, Recharge, Seal Subscriptions, Alia, Hiro Analytics.

Automation and data: n8n, Supabase, Next.js, Vercel.

EXPERIENCE

Customer Lifecycle Lead · Tethrd

Jul 2026 to present

- Lead the entire retention vertical and client relationships across six key Klaviyo accounts: Bendon Lingerie (AU, NZ), Steak King (HK, UK), Rippl and Pistachio Papi.
- Delivered Bendon's best email-attributed month on record in AU and NZ within just two months of onboarding. October 2026 even beat November 2025 (Black Friday) without a major sale, by unlocking its biggest untapped channels.
- Grew Steak King HK's email revenue 152% YoY in October with strategic FOMO-led sales behind email-exclusive access, then grew the list against them.
- Work with paid social and paid media teams on account strategy, targeting store revenue and profit over attributed revenue.
- Built offer models and projections for clients, including Bendon's limited-time offers, to protect margin and drive profit.
- Led Steak King's UK launch from £0 to about £75k a month in five months (about 28% average MoM, peaking at 156%), with email at about 50% of store revenue and repeat revenue from 1% to 31% in three months. Designed and developed its cashback loyalty programme on Rise.
- Cut delivery costs by 64% with AI workflows: Figma-to-Klaviyo agents removed the need for a Klaviyo specialist, and playbooks, the second brain and flow and campaign skills let me take on more accounts without junior hires.

Principal Consultant, Customer Lifecycle · Webprofits

Apr 2025 to Jun 2026

- Owned the Klaviyo programme and client relationships for major DTC brands including SharkNinja across Australia and New Zealand, from kickoffs to quarterly reviews. Promoted to Principal in nine months, the company's fastest.
- Founding contributor to the company's Claude Code rollout, engineering lifecycle skills for daily Klaviyo performance dashboards, custom client workflows, list growth, flow flags, deliverability monitoring and end-to-end QA.
- Grew SharkNinja ANZ from a database of about 350,000 to over 1M active email profiles in under two years.
- Led SharkNinja's account consolidation when the separate Shark and Ninja sites merged in AU and NZ, covering legal review, migration, warmup and contract negotiation.
- Built n8n workflows for custom client flows, such as personalised stock-expiry alerts to move perishable stock.

Head of Strategy · RetainIQ

Dec 2022 to Mar 2025

- Rose from first account manager in the marketing division to Head of Strategy within three years, managing 20 to 30 US DTC brands and hiring, training and leading 5+ junior account managers.
- Helped build RetainIQ's AI personalisation tool, a personalisation layer inside Klaviyo, writing PRDs alongside product managers, working with the backend team and mining Klaviyo's API documentation for new capabilities.
- Deployed it as a custom solution for Seelbach's, lifting browse abandonment conversion 3,789% and checkout abandonment conversion 122%, and for Mochidoki, growing email revenue 208%.
- Lifted NOOMA's 180-day LTV 18% and subscription opt-ins 64% with personalised retention flows.

AI SYSTEMS I'VE BUILT

- **Figma-to-Klaviyo agents.** An end-to-end Python and Claude Code tool with 700+ automated tests. Replaced the need for a Klaviyo technical specialist and cut campaign builds from days to minutes, and flows to under three hours.
- **Custom n8n automations.** Price drops, missed delivery dates, deal analytics, price ladders, billing alerts and custom metrics beyond what Klaviyo does natively.
- **Second brain.** Daily Slack, Gmail and Fathom compiled into a knowledge base that feeds every Claude Code session.
- **Keepr.** A work-in-progress retention analytics platform built from scratch on Next.js, Supabase and Node.js.

EDUCATION

Bachelor of Engineering, Mechanical. B.M.S. College of Engineering, Bengaluru, 2022.
